Home Of The Future

How do you get your family, business team or, in our case, ~200 people to make decisions, resolve conflicts and feel that they have been heard?

Narara Ecovillage uses Sociocracy, a decision-making and governance system that:

- is inclusive, transparent and equitable, including all voices
- promotes a better use of resources, and coordination of activities
- leads to care, respect and cooperation
- ensures decisions are reviewed to determine their ongoing usefulness

This system has relevance for communities, businesses, non-profits, families and more.

Come and have a 'taste' of this methodology in a presentation by ecovillage founder Lyndall Parris

- When: Friday 24 January, 5:00 – 7:00 pm
- Where: Narara Ecovillage Hall, 33 Gugandi Rd
- Cost: Donation requested
- Register now by sending an email to: Lyndall@nararaecovillage.com

Sociocracy in Action

A contemporary home is characterized by its embrace of current design trends and a fusion of various styles, materials, and innovative technologies. A contemporary home is a reflection of the present moment in design, blending innovation, functionality, and a variety of influences to create a visually striking and comfortable living space. The flexibility of contemporary design allows for a personalized and eclectic expression of individual style.

The Open Day (talk and tour) shows what Narara Ecovillage is all about, and demonstrates how we are activating a resilient community with ecological, social and economic potential by:

- shared food growing, natural retreats and Permaculture spaces
- shared community and workplaces
- examples of highly efficient low-carbon homes now and in the next stage

All welcome.

- When: Sat January 25, 10.30am - 1.30pm
- Where: Narara Ecovillage Hall, 33 Gugandi Road 2250
- Cost: \$15 includes talk & walking tour around village, kids & NELN members free!
- [More Details and Registration](#)

If this is your first visit to Narara Ecovillage, you may find this interesting: the [Open Day Preview](#) introduces the ecovillage and its unfolding story.
